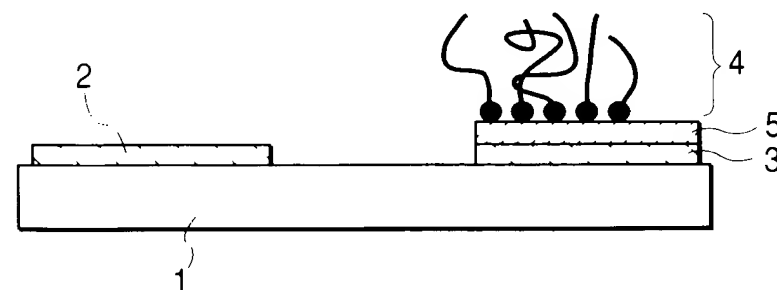

Figure 1 consists of 12 maps of the United States, each showing the distribution of a different species of the genus *Aedes*. The maps are arranged in a vertical column. Each map is labeled with a number (1-12) and the species name. The distributions are as follows:

- 1. *Aedes albopictus*: Widespread across the entire United States.
- 2. *Aedes canadensis*: Widespread across the entire United States.
- 3. *Aedes sollicitans*: Widespread across the entire United States.
- 4. *Aedes triseriatus*: Widespread across the entire United States.
- 5. *Aedes albopictus*: Widespread across the entire United States.
- 6. *Aedes canadensis*: Widespread across the entire United States.
- 7. *Aedes sollicitans*: Widespread across the entire United States.
- 8. *Aedes triseriatus*: Widespread across the entire United States.
- 9. *Aedes albopictus*: Widespread across the entire United States.
- 10. *Aedes canadensis*: Widespread across the entire United States.
- 11. *Aedes sollicitans*: Widespread across the entire United States.
- 12. *Aedes triseriatus*: Widespread across the entire United States.
